

BUFFER SYSTEM FOR MACHINED PARTS

TECHNICAL DATA

Type of conveyor	TB conveyor
Drive	Center drive
Width	1000 mm
Length	5000 mm

INDUSTRY

Automotive Supplier

SPECIAL FEATURES

- space-saving, compact design
- 180° deflection doesn't require an additional drive
- available as an open, or closed buffer system

PROJECT DESCRIPTION

This serpentine buffer system processes parts for additional machining. The parts automatically feed into the buffer system and move onto the next workstation without the use of a product carrier. The system is able to buffer several hundred parts at once and requires minimal monitoring.
