

BUFFER SYSTEM FOR MACHINED PARTS

TECHNICAL DATA

| | |
|------------------|--------------------|
| Type of conveyor | TB conveyor |
| Drive | Center drive |
| Width | 3.28 ft (1000 mm) |
| Length | 16.40 ft (5000 mm) |

INDUSTRY

Automotive Supplier

SPECIAL FEATURES

- space-saving, compact design
- 180° deflection doesn't require an additional drive
- available as an open, or closed buffer system

PROJECT DESCRIPTION

This serpentine buffer system processes parts for additional machining. The parts automatically feed into the buffer system and move onto the next workstation without the use of a product carrier. The system is able to buffer several hundred parts at once and requires minimal monitoring.
