

SYNCHRONIC VACUUM CONVEYORS

TECHNICAL DATA

Type	SOLTB-V-KR-Z-LA special
Conveyor width	6.22 in (158 mm)
Pairs of air connections	10
Working space	Horizontal
Toothed belts	4 - Width 10.74 in (9 mm)
Distance from center to center of the wheels	2 x 3.77 ft (2 x 1150 mm)

INDUSTRY

Electronics, medical,
pharmaceutical, solar

PROJECT DESCRIPTION

Parts are transferred from one vacuum conveyor belt to a second vacuum conveyor belt. The absolute synchronicity of the two conveyor belts is important. Synchronization is guaranteed by the fact that the two belts are driven by one motor and one drive shaft. The required vacuum chambers are integrated in the basic structure of the conveyor belts through the clever use of the Quick-Set framing system.
